Subject: Fw: JJV comments on formaldehyde... finally.. through page 249
Attachments: Formaldehyde_draft Tox Review_ERC_May2016 JJV.docx

Hi Anna,

I hate to do this, but we just received another set of comments from John Vandenberg. It looks like he only had comments through page 250, so maybe it will be easy to integrate these comments into the compiled draft you are working with? Please let us know how you think this affects your timeline.

Thanks,
Andrew

All,

I must apologize profusely for not sending the comments on the draft much earlier – like more a month ago. I hope these may still be of some value. Its clear that a terrific effort has been put into this draft, to evaluate evidence and convey information as thoroughly yet concisely, and clearly as possible.

I went back through my files to find my comments on the draft, and added some edits to clarify my first run at it, hoping I could actually finish it, but I only made it through about page 250. Sorry. I also have comments on the preface that remain handwritten and too difficult to read, even for myself, that I'll try to transpose onto the draft I have. It may be that you have a newer version of the preface that I should review instead – not sure.

I'm going on vacation as soon as my wife returns in a few minutes and I'm sending this to partially clear my conscience! I'll be back in the office on Aug 29.

John
